SUMMARY

Results-driven AI/ML Engineer and BCA (Data Science) graduate with 3+ year of professional experience building intelligent systems using LLMs, Computer Vision, and NLP. Proven track record delivering end-to-end AI solutions — from data preprocessing and model training to cloud deployment on AWS. Experienced in GPT-4o integration, vector databases, OpenCV, Django, and scalable backend architecture. Passionate about creating impactful, production-ready AI products.

TECHNICAL SKILLS

AI/ML & Data Science	LLMs (GPT-4o), Vector Databases, Computer Vision, NLP, Machine Learning, OpenCV, TensorFlow, OpenVINO, Ultralytics YOLO, RAG, Langchain, N8N, Power Automate (Copilot)
Programming Languages	Python, Java, JavaScript, C, C++, R, HTML/CSS, SQL
Frameworks & Tools	Django, Docker, OpenAI API, MongoDB, Pandas, NumPy, Tableau, Power BI
Cloud & Deployment	AWS, Hostinger, Google APIs
Soft Skills	Project Management, Team Collaboration, Problem Solving, Detail-Oriented

EXPERIENCE

- Siksha Bhavishayan Private Limited** — *Technical Head / AI Developer*

April 2025 – Present

 - Leading complete technical operations for an education and counseling platform — managing the development team, assigning tasks, reviewing deliverables, and architecting end-to-end cloud infrastructure on AWS and VPS with Docker-based containerization for scalable, reliable production systems.
 - Built AI-powered chatbots, summarization systems, and AI-generated counseling & academic reports using LLMs (RAG, ChatGPT API) with a self-built custom OCR pipeline for intelligent document processing and personalized student insights.
 - Designed and automated complex workflows using n8n, Microsoft Copilot, and Power Automate — integrating APIs, reducing manual operations, and connecting platform services end-to-end using Python and Django.
- Karai Innovation** — *AI/ML Engineer*

January 2024 – April 2025

 - Engineered an AI-powered chatbot using GPT-4o and vector databases to build an NCERT-based knowledge retrieval system for IAS exam aspirants, improving answer relevance by ~40%; also architected flowchart-based curriculum guidance with automated test series evaluation.
 - Integrated OCR and speech-to-text capabilities using Google APIs, and led full-stack development of the IAS SATHI platform from conception to production using Python (Django), OpenAI API, and Docker.
 - Deployed scalable containerized backend solutions on AWS and Hostinger using Docker, ensuring high availability and performance for 500+ concurrent users.
- Vyza Solutions** — *AI Automation Intern (Data Science)*

July 2023 – December 2023

 - Delivered data analysis and predictive modeling solutions generating actionable business insights for client strategic decision-making.

- Developed automated data pipelines using Python (Pandas, NumPy), reducing manual data processing time by approximately 30%.
- Built and deployed machine learning models improving data quality and predictive accuracy across multiple client projects.
- Created interactive executive dashboards and reports using Tableau and Power BI for data-driven stakeholder presentations.

Aimpathy Consulting — HR Data Analyst Intern

August 2023 — December 2023

- Led data extraction, cleaning, and structuring of employee datasets using Python, improving overall data quality by 25%.
- Produced precise HR analytics insights enabling strategic workforce planning and organizational efficiency improvements.
- Automated repetitive reporting workflows, saving 5+ hours per week for the HR department.

PROJECTS

IAS SATHI — AI Exam Prep Platform | Python, Django, GPT-4o, Docker, Google APIs

Feb 2025 — Present

- Built a full-stack AI platform for IAS preparation featuring an LLM-powered chatbot, flowchart syllabus navigation, automated test series, answer evaluation, OCR, and speech-to-text.
- Deployed on Hostinger using Docker; backend supports multiple concurrent users with real-time GPT-4o responses and scalable architecture.

Computer Vision — Object Detection (Govt. Project) | Python, OpenCV, OpenVINO, Ultralytics YOLO

Jan 2024 — Feb 2024

- Developed a large-scale surveillance system deployed at 100+ government locations using a custom YOLO model trained on 1,000+ annotated images.
- Achieved high-accuracy real-time object detection using OpenVINO for optimized inference on edge hardware.

WhatsApp Chat Analysis | Python, NLP, Machine Learning, Matplotlib

Sept 2023 — Dec 2023

- Built an NLP-driven analytics tool extracting behavioral insights from chat data, including sentiment trends, activity patterns, and engagement metrics with rich visualizations.

Face Recognition System | Python, OpenCV, TensorFlow, NumPy

Jan 2023 — Mar 2023

- Developed a real-time face detection and recognition system achieving 95% accuracy with live camera module integration.

EDUCATION

BCA — Data Science	Career Point University, Kota	2021 — 2024	Graduated
XII — PCM (Science)	Bakhshi Sprindales Sr. Sec., Kota	2021	85.6%
X — Secondary	Bakhshi Sprindales Sr. Sec., Kota	2019	87.8%

CERTIFICATIONS

- AI Data Science and Data Analytics — Samatrix.io (2022)
- Data Analysis Using Python — Samatrix.io (2023)
- Statistics Using Python — Samatrix.io (2023)
- R Programming for Data Science — Samatrix.io (2023)
